

AJAS MOHAMMED

Python Backend Engineer

Kochi, India · +91 95679 87785 · ajasmohammed09@gmail.com · GitHub · LinkedIn · Portfolio

SUMMARY

Backend developer, 2+ years on production Django and FastAPI systems. Primary backend maintainer of an e-learning platform, owning REST API design, Celery pipelines, PostgreSQL performance and deployment. Also build LLM and retrieval services with LangChain, LangGraph and pgvector/Qdrant.

EXPERIENCE

Software Developer — Neumeral Technologies

Apr 2024 — Present

Kochi, India

- Primary backend maintainer of Learnable, a Django and DRF e-learning platform, owning its core, accounts and portal apps.
- Built the mock-interview pipeline end to end: data model, audio-format validation, scoring, and Celery workers so 3–5 min of transcription and grading runs off the request cycle.
- Shipped subscriptions and payments with Razorpay and RevenueCat, reworking the Android-only purchase API into a multi-platform mobile endpoint.
- Cut course-page latency by replacing page-number with cursor pagination, adding an index-backed completion check and caching course-item lookups: 800 ms to 200 ms on the heaviest endpoints.
- Set up Pactflow contract tests with PostgreSQL and Redis service containers in GitHub Actions, and deploy tagged releases to Hetzner with Ansible, nginx and Docker.
- Sole author of Learnable Agents, a FastAPI and LangGraph assistant routing messages to course-enquiry, demo-booking and content agents over WebSockets, with PostgreSQL checkpointing, interrupt/resume for mid-chat email verification and Langfuse tracing.

Software Developer (Contract) — CloudToBuild

Jun 2025 — Present

Remote

- Built the checkout and payments API and its admin surface on FastAPI with SQLAlchemy and Alembic migrations, shipped through GitHub Actions CI and scripted deploys. Also worked on an e-commerce storefront and an AI-assisted site builder.
- Use agentic coding tools daily: Claude Code, Cursor and Antigravity, plus self-built MCP servers.

Backend Developer — Allwin Technologies

Jan 2024 — Mar 2024

- Built RESTful APIs with Django and Django REST Framework, and modelled the database schemas behind them.

SELECTED PROJECTS

- **Learnable** — Django and DRF e-learning platform I maintain at Neumeral. Celery and Redis pipelines for transcription and grading, Razorpay and RevenueCat payment integration, a LangGraph AI assistant, PostgreSQL, Elasticsearch and a Next.js client.
- **RagFusion** — hybrid retrieval service. FastAPI with LangChain and LangGraph, fusing Qdrant vector search with Elasticsearch lexical search into one ranking. Async SQLAlchemy on PostgreSQL, Celery for ingestion, Alembic migrations.
- **GitAI** — FastAPI service that writes Git commit messages from staged diffs. GitPython for diff extraction, LangChain prompt pipelines, SQLAlchemy on PostgreSQL, Docker Compose.
- **Cassette** — Django + pgvector AI chatbot SaaS shipped at Neumeral. Vector search on PostgreSQL for retrieval-backed chat over customer content.

TECHNICAL SKILLS

Languages Python · SQL · JavaScript · TypeScript

Frameworks Django · Django REST Framework · FastAPI · Celery · Django Channels · React · Next.js

APIs REST · WebSockets · JWT auth · OpenAPI

Data PostgreSQL · pgvector · Redis · MySQL · SQLite · Elasticsearch · Qdrant

AI LangChain · LangGraph · RAG · Langfuse · MCP · OpenAI / Gemini / Groq / Ollama APIs

Tools Docker · Docker Compose · GitHub Actions · Ansible · nginx · Linux · Git · uv · Claude Code · Cursor · Antigravity

EDUCATION

Diploma in Electrical and Electronic Engineering

Jul 2020 — Jul 2023

Government Polytechnic College, Punalur

GPA: 7.79
