SUMMARY

Python Developer with hands-on experience in backend and full-stack development. Skilled in using Python and Django to develop reliable backend systems and RESTful APIs, and experienced with React for building clean, responsive user interfaces. Comfortable working with databases and managing end-to-end application workflows. Known for being a proactive team player who understands project goals and collaborates well with designers and developers to deliver practical, high-quality solutions. Always looking to grow by taking on new challenges in modern software development.

EXPERIENCE

Software Developer - Neumeral Technologies

Apr '24 — Present
Kochi

Full-Stack Developer, contributing to both frontend and backend development

- Designed and implemented REST APIs using Django and Django REST Framework for content publishing and learning platforms.
- Built background job pipelines using Celery and Redis for asynchronous processing and automation.
- Refactored legacy codebase for performance, maintainability, and scalability improvements.
- Collaborated with frontend teams to integrate APIs into React and template-based UIs.
- Containerized services using Docker and automated deployments using Ansible.

Backend Developer - Allwin Technologies

Jan '24 — Mar '24

Designed and implemented scalable RESTful APIs using Django and Django REST Framework, supporting efficient communication between front-end and back-end systems.

- Collaborated with cross-functional teams to troubleshoot and improve backend systems.
- Managed database models and optimized queries enhancing API performance and reliability.

PROJECTS

Learnable - Online Learning Portal, Neumeral Technologies

Ernakulam, India

- Built backend services and APIs using Django and Django REST Framework for course listing, enrollment and learning workflows.
- Wrote optimized database queries using Django ORM, implemented contract tests and unit tests for reliability.
- Developed full-stack features using Django templates and React.
- Automated infrastructure and deployment using Docker, Docker Compose and Ansible.
- Integrated YouTube API and Odoo for automated course data synchronization.

Neusler, Neumeral Technologies

- Refactored a legacy Django + Wagtail codebase and upgraded dependencies to newer framework versions.
- Implemented API endpoints and backend models to support new publishing workflows.
- Optimized database queries and caching strategies for improved platform performance.
- Contributed to the Wagtail CMS implementation by fixing bugs and building custom functionalities for content management.

GitAI - Commit Message Generator

- Built a FastAPI application to generate structured Git commit messages using LLMs via LangChain.
- Used GitPython to extract staged diffs and constructed prompt pipelines for LLM processing.
- Implemented persistence using SQLAlchemy with support for PostgreSQL and SQLite.
- Containerized the application using Docker and Docker Compose.

SKILLS

Programming Languages Python, JavaScript, HTML, CSS

Frameworks & Libraries Django, Django REST framework, ReactJS, Next.js, LangChain

Databases MySQL, PostgreSQL

Tools Docker, Ansible, Redis, Git, Linux, Claude Code, Cursor

Languages English, Malayalam

EDUCATION

Diploma in Electrical and Electronic Engineering, Government Polytechnic College Punalur (GPA: 7.79)

Jul '20 — Jul '23

CERTIFICATIONS

Backend Developer, Allwin Technologies

Jan '01
